

Tiimz Workforce Management

Manage your business anywhere, anytime

Service Description

Tiimz is an advanced workforce management tool designed to simplify workflow processes and increase the efficiency of your mobile teams. The solution replaces inefficient paper-based methods and helps you to organize your business and stay in touch 24/7. It is available for a wide range of mobile devices, from feature phones to sophisticated smartphones and tablets.

Main Features

Task Allocation – dispatch jobs to your field workers with a single click

Time Tracking – monitor employee time and attendance at every business location

Job Scheduling – interactive real time scheduling available for everyone

Work Progress Monitoring – real time status update for ongoing tasks

Visual proof – exchange pictures of occurring problems or report completed tasks

Advantages

Real time workflow management at any location

Streamlined operations

Immediate response to changing conditions

Reduced time and increase productivity

Optimized field resources

Lower operational costs

Enhanced customer service
